

LED Lighting – Convenience Store/Gas Station Interior & Exterior

Local Sunoco upgrades entire location to LED

Company Profile:

Sunoco at I-4 & US98 in Lakeland, Florida
Upgraded all their lighting, inside & out, to
LED lighting.

Project Description:

Vootu surveyed the Sunoco Convenience Store/Gas Station at I-4 * US98 in Lakeland, Florida for energy savings through the installation of LED lighting. It was determined that vootu could retrofit all the interior ceiling 8' Fluorescent Lighting, the vertical "reachin" cooler door fluorescent lighting as well as the exterior gas pump canopy lights, the 7 poles and the 8' fluorescent tubes around the perimeter of the location. Essentially vootu retrofitted all the lighting at the location over to our line of commercial grade vootu LED Lighting. This resulted in a project that reduced their energy usage by 65% and provided a return on their investment of 14 months!

Previous Annual Operating Cost: \$11,834.70

Current Annual Operating Cost: \$2,844.55

Annual Savings: \$8,990.15

LED Project Investment: \$10,393.43

ROI: 1.15 years (14 months)

"By converting the entire location (inside & out) to LED Lighting, Lakeland Sunoco benefited from a total savings of \$8,990.15 annually."
